(30 May 2023)**

Time: 13:00-14:00

Language: English

**This event will
be in-person (対面)
– see map on the next
page.**

Title:

Shaping the Future: Fusic's Journey with Cutting-Edge Technologies and Entrepreneurship

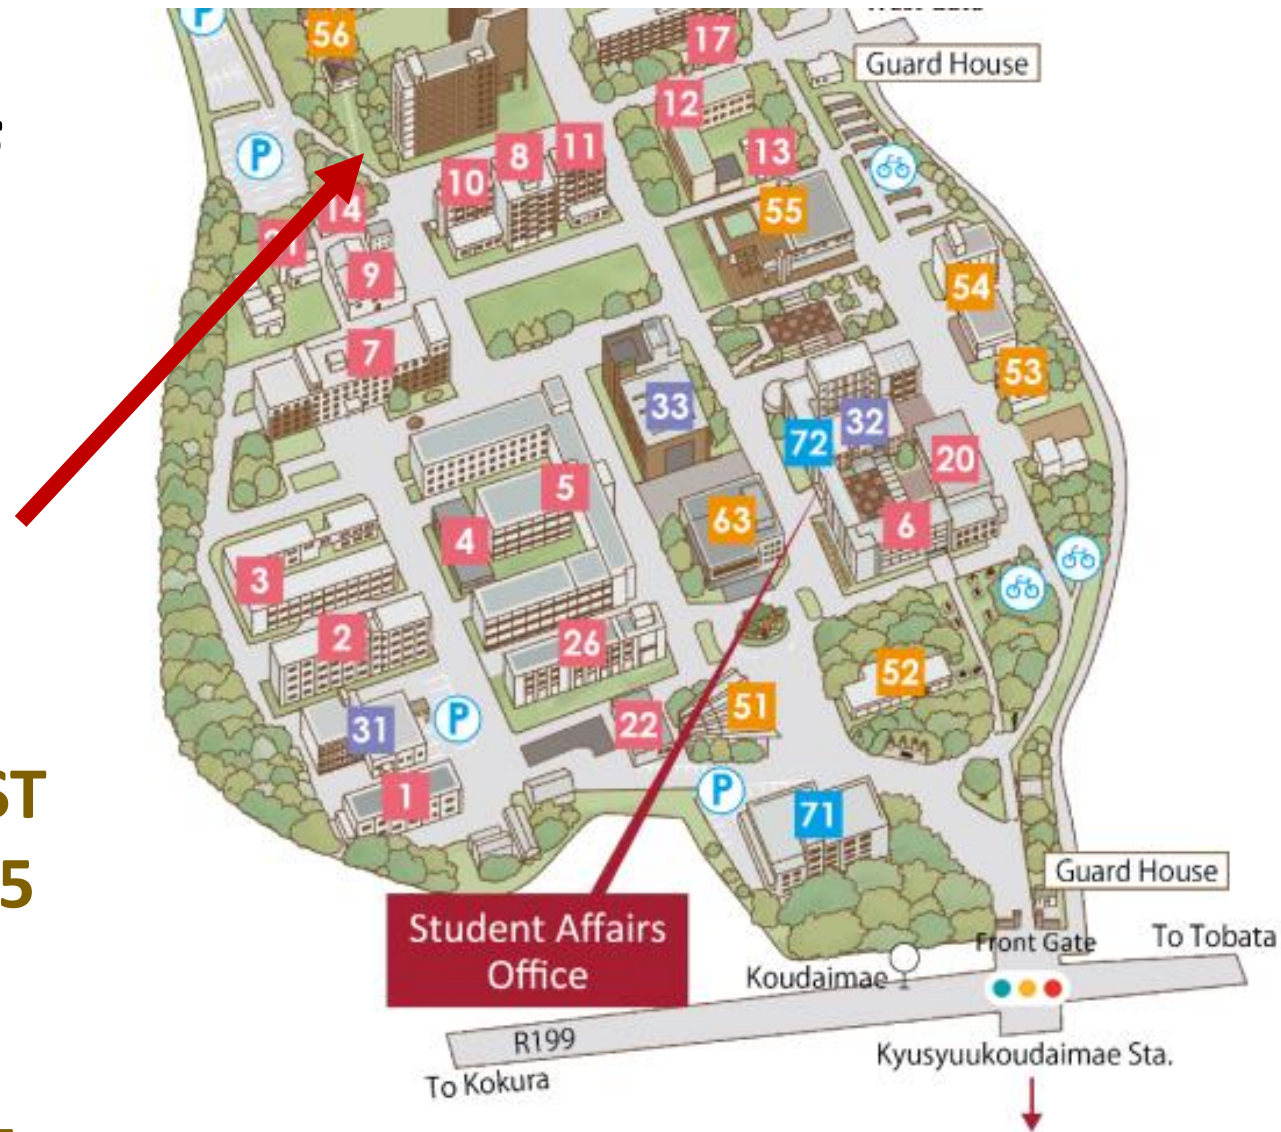

Abstract:

Over the past 20 years since its establishment, Fusic has consistently pursued new technologies and cherished entrepreneurial spirit that envisions the future. In this seminar, we'll show you how Fusic has adopted technologies like AI, IoT, and cloud computing. Even before AWS established a region in Japan, we started utilizing AWS. In 2016, we established a machine learning team. In the same year, we launched our own service called "mockmock" which accelerates IoT development. In addition, we've been exploring the potential of businesses using satellites as a further challenge. The background behind them is our entrepreneurship, that is, the importance of 'creating something with our own hands'. We look forward to meeting you at the seminar!
